Network Reinstatement Form for Repeated Operating System Compromises

- 1) I understand that because of multiple compromises, my computer must be reformatted in order to verify that it is secure from continued Internet worms and other compromises that still may be hidden on the compromised computer.
- 2) I agree that when I have reformatted and reinstalled the Operating System (OS) software, that I will configure my computer to automatically check for and install Operating System (OS) updates. I understand that if I do not know how to do this, that the ITS Support Center can assist me in making this configuration change.
- 3) I understand that if I fail to re-install and regularly update my OS, that my computer may be indefinitely disconnected from the UNM network, and disciplinary actions may result.
